

Become  
**Specialist IT Test Environment (All Gender)**  
Our Chief Information Office (CIO) in Hamburg is waiting for you.

We believe your interests to be equally important as the ones of your team. This is why you can achieve even more with us. Sounds good? Then you are just right with us.

### Our promise

We help people move forward every day. We encourage you to develop your own ideas and offer an open company culture where everyone respects each other irrespective of hierarchy. You'll meet a variety of different people, living our values all day every day to do the best we can with integrity and excellence for our customers and stakeholders. Join our team for a diverse working experience and bring your personal contribution to our brand.

### Your Part

- Work closely with our test- and release managers
- Oversee our E2E connected test environments
- Establish and manage connectivity between the many systems and applications
- Be an active part of code management (controlled code deployments of initial and incremental code drops) in coordination with test- and release teams
- Facilitate data load and data sync across all relevant systems
- Coordinate batch and time jumps schedules and procedures in alignment with test teams
- Help investigate defects (distinguish defects as code or environment related, route to the right teams)
- Monitor health of the connected environments and find issues before they hit the testing team
- Enforce resolution of test environment issues to help the teams complete their test as fast as possible
- Report on the status of environments and suggest measures to increase availability and stability
- Coordinate and negotiate usage of environment and data for our project and release teams based on transparent processes
- Create and maintain a clear view for all stakeholders on which project is using which environments for how long

- Protect the environments from undesired changes / deployments / data feeds
- Constantly align our test environments as close as possible to production environments
- Set up new environments, manage scaling etc. in coordination with the test demand

## What you're made of

- Experienced in managing complex/multiple IT systems
- Minimum 3 years experience in working in a cross functional setup with teams span across multiple geographies
- Clear articulation of IT structure and functions within Barclays and the services and product set of the Group
- Broad understanding of Barclaycard strategy and business direction
- Extensive knowledge of analytic techniques and methods
- Good knowledge of business change processes, methods and tools
- Broad understanding of acceptance and integration process and methods
- Good understanding of project and change management processes
- Demonstrate a wide knowledge of IT service infrastructure and its exploitation in both own and other organisations
- Demonstrate effective communication, both orally and in writing, with subordinates, colleagues, clients and customers at all levels, both formally and informally – an experienced communicator who nurtures relationships for mutual gain
- Able to analyse, diagnose, design, plan, execute and evaluate work to time and quality targets, exhibiting thorough familiarity with available methods, procedures, tools, equipment and standards associated with own infrastructure specialism and making correct choices from alternative

## About us

We're not an average bank. We're Barclaycard: modern, diverse and digitally minded. As one of the country's leading credit institutions, we have over 700 employees based in Hamburg. For the past 25 years, we have been offering our customers flexible payment options and helpful financing solutions that have resulted in over 1 million customers.
